You can also check the map to see the use of different plugs and sockets in the world.

What voltage and frequency in Portugal?

In Portugal the standard voltage is 230 V and the frequency is 50 Hz.

You cannot use your electric appliances in Portugal without a voltage converter, because the standard voltage in Portugal (230 V) is higher than in the United States of America (120 V).

You can seriously damage your appliances. You need a voltage converter! You can find voltage converters at Amazon. Because you also need a power plug adapter, you should consider a combined plug adapter/voltage converter.

Also the frequency in Portugal (50 Hz) differs from the frequency in the United States of America (60 Hz). You should use a voltage converter which also changes the frequency, but these are hard to find. If your converter cannot change the frequency, be warned! Be especially careful with moving, rotating and time related appliances like clocks, shavers and electric fan heaters.

To be sure, check the label on the appliance. Some appliances never need a converter. If the label states 'INPUT: 100-240V, 50/60 Hz' the appliance can be used in all countries in the world. This is common for chargers of tablets/laptops, photo cameras, cell phones, toothbrushes, etc.
